

EQUANS SWITZERLAND

Shaping the future together

1. Electrical engineering
2. Heating systems
3. Ventilation, air conditioning
4. Refrigeration systems
5. Sanitation systems
6. ICT Services
7. Security
8. Technical Services
9. PV & Solar
10. Energy efficiency
11. E-Mobility
12. Facility & Property Management
13. Building automation

Holistic approaches are required for the transition to a digital, energy-efficient and industrially strong future. As a leading full-service provider of building and energy solutions, we make smart buildings real – from planning and implementation to management.

Energy optimisation

Energy-efficient buildings are key to the energy transition. We think holistically about building systems and develop innovative solutions for specific customer requirements. We focus on the efficient interaction of all trades, from plumbing, cooling and air conditioning to ventilation, heating, electrical engineering and security systems.

At home throughout Switzerland

Thanks to nationwide coverage with more than 100 locations, we are available to our customers on site and are familiar with local requirements.

Digitalisation

Digital transformation is also advancing in the building sector. From digital construction processes with BIM models and efficient ICT services to process automation and smart buildings, we are shaping digital transformation in the construction industry.

Multitec

We have a unique range of skills. Thanks to our Multitec approach, we are able to optimally pool these to cover many different trades and regions.

Electrical engineering

- Electrical, low- and heavy-current systems
- Lighting systems, emergency and public lighting systems
- Switchgear construction and control systems
- Universal cabling for buildings
- UPS systems
- Lightning protection
- Photovoltaics and solar thermal energy
- Electromobility, charging stations
- VDE 702/703 testing of appliances

Heating, Ventilation, AC, Sanitation

- Heating systems
- Large heat pumps
- Cold water systems
- Ventilation/air-conditioning systems
- Ventilation system cleaning and hygiene inspection
- Sanitation systems
- Compressed air systems
- Clean-room and laboratory systems
- Clean-room components for hospitals, air outlets for operating theatres

Refrigeration systems

- Commercial refrigeration systems
- Plug-in and centrally cooled refrigeration and freezer cabinets
- Blast chillers, ice machines, exclusive representation
- Industrial refrigeration systems
- Special concepts for shops and alternative energies, energy optimisation
- Energy optimisation

ICT Services

- Cloud services
- Managed Services
- Telephony, UCC and video solutions
- Networks, Wi-Fi and security
- Client and server, storage and backup
- Hospitality TV and infotainment
- Digital signage
- Roll-out and Onsite Services across Switzerland
- Fibre-optic and low-voltage installations

Security & Automation

- Fire alarm systems
- Burglar alarm systems
- Video surveillance systems
- Access control systems
- Voice alarm systems (EVAK)
- Intercom systems
- Safety way guidance systems
- Building and process automation
- Building systems technology
- Facility management system
- Process automation

Technical Services

- Maintenance (inspection, repairs, troubleshooting)
- 24/7 call-out service, 365 days a year
- Property and warranty management
- Innovative products for operational optimisation
- Technical partner of national and regional FM providers
- A multilingual partner (SPoC) throughout Switzerland
- Services from a single source for HVCSE, security and automation and ICT

Our service portfolio
